PROCEEDINGS OF LANDTRONICS CONFERENCE HELD FEBRUARY 15 AND 16, 1985 AT THE ANNENBERG SCHOOL OF COMMUNICATION, UNIVERSITY OF SOUTHERN CALIFORNIA

INTRODUCTION

The first of three conferences discussing the link between information technology and urban land policy was held February 15 and 16, 1985 at the Annenberg School of Communication, University of Southern California. The conference was presented by the Lincoln Institute of Land Policy, the Annenberg School of Communication and the Law Center of the University of Southern California. The second of the conferences was held in London in June 1985, and the final conference is scheduled for November 11 and 12, 1986 in Sydney.

At the University of Southern California conference, a divergent group of leading professionals assembled to consider how emerging informational technologies are affecting the design of buildings, land use and planning, business communications, the growth of "high tech" suburban research parks and a number of related topics. The papers which were presented at this conference are being published in this special section of the *Computer/Law Journal*. We hope that you find them interesting and informative.

Karen L. Elburn,

Editor-in-Chief
